Dear Tina

Firstly I would like to thank you for your patience, understanding and professionalism during the course. I wish I had teachers of your calibre when I was at school I know I would have achieved more.

Before I started working with you my time management was very poor, I never had time, I was always too busy and my efficiency level was just 25%.

Our first session was time management which had an immediate impact on the way I managed my day. The results quite frankly were amazing; within a few days of implementing your 'Traffic Light System' I was completing more tasks, and had time to plan for the next day.

My days are now pro-active not re-active which is proving to be very beneficial, not only in my business, but in my home life too. After just 6 sessions my efficiency rating has more than doubled to 53% which I didn't think was possible.

It goes without out saying that I would recommend your business coaching course to any business owner, or executive looking to improve their efficiency.

Kind regards

*William Norton
