Dear Tina,

In appreciation of your help so far, please find below a couple of testimonials from us based on your Coaching assistance and also the Time Management & Delegation Training you have recently provided us with.

May I take this opportunity to say thank you one more time for all of your hard work and advice so far. It's been very interesting and a real eye opener.

Coaching

'Tina and Coaching Dynamics were highly recommended to us by our accountants as a really good and engaging business coach... And they were right.

We have found Tina's analytical approach, coupled with her friendly nature and genuine interest in who we are and our business a real breath of fresh air and internally extremely motivating. She is providing us with the tools to take our business from strength to strength. Sometimes it takes an outside view point on your business to get you to look in the right direction and take the steps to improvement'.

Time Management & Delegation Training

'We asked Tina to provide our whole company with Time Management and also Delegation training as I felt we were spending too much time within the office on the wrong things and not enough on the right things. I also felt that the art of delegation was something we could improve on.

We hired a local function venue to remove all the staff from their computers and phones so Tina could have our undivided attention and I am really pleased to say that she engaged with everyone from the start and throughout. Some of the Time Management & Delegation techniques are really quite straight forward and easy to implement and it was felt by all that the training we received was really useful. Although we are all still very much under pressure, with the skills we learnt it now feels that this is controlled by us rather than controlling us. Thanks Tina'.

Yours faithfully
